- Design Thinking
- Strong Communication

PROFILE

I'm a passionate, qualified, and professional software developer with two years of experience in database administration and website design. Designed creative and responsive software solutions with 99% client satisfaction. Team player with an eye for detail.

WORK EXPERIENCE

Front End Developer

Cagrib

I collaborated as the front-end developer on a web application called Cagrib, designed for an agro-market. The platform emphasizes the agro-market's commitment to providing fresh, locally sourced products. My role involved implementing user-friendly interfaces and ensuring smooth navigation for customers to easily explore and make purchases. Working closely with the web design team, I contributed to creating a professional and visually appealing front end that effectively showcases the agro-market's mission and products.

Full Stack Developer

VTIB Resource Management System

I spearheaded the development of a cutting-edge Resource Management System for VTIB, a dynamic and forward-thinking organization. This innovative platform revolutionizes the way resources are allocated and utilized, offering streamlined processes for managing assets, personnel, and schedules. By leveraging my expertise in software development, I ensured the creation of a robust system that optimizes resource efficiency and enhances operational productivity for VTIB.
